If you run into an issue it is because the repository is public but not everyone can change it. It is `public` but `read-only`. To push changes to the repository you need to be a collaborator or a member of the project.

The account owner - `sarah` needs to add you as a collaborator. While logged in to the Gitea UI as user `sarah` go to `Settings` → `Collaborators` of the project and add `max` as collaborate with `write` permissions.

Use Sarah's credentials:
Username: `sarah`
Password: `Sarah_pass123`

Check

Next →

✓ Max added as collaborator with write permissions

Terminal 1

+

GIT Portal UI

Stop Lab

```
git config --global user.email "you@example.com"
git config --global user.name "Your Name"

to set your account's default identity.
Omit --global to set the identity only in this repository.

fatal: unable to auto-detect email address (got 'max@dev01.(none)')
max (master)$ git config user.email "max@example.com"
max (master)$ git config user.name "max"
max (master)$ git commit -m "Added fox-and-grapes story"
On branch master
Your branch is up to date with 'origin/master'.
